

As XM satellite radio subscribers for close to a year and a half, my family and I benefit immensely from the variety and quality of programming that are not available elsewhere. Whether it's Radio Disney, a sporting event, a talk radio show or traffic and weather reports, we depend on our satellite radio as a valuable source of music and information. I respectfully urge you to reject the National Association of Broadcaster's petition 04-160 and to support satellite radio's ability to provide it's listeners throughout the United States the kind of programming it values, demands, depends on, and deserves.
